Deluge Kits

Kit Formats · https://www.kit-maker.com/docs/km2-deluge-kits/

This is the Kit Maker 2 manual. Using Kit Maker 3? Read the Kit Maker 3 manual.

Once you have created your drum kits for Deluge, follow these instructions on how to import them:

Copy the *content* of the "KITS" folder to the KITS folder of the Deluge.

Copy the *folder* "KIT MAKER" to the SAMPLES/DRUMS folder of the Deluge.
The path should be [SDCARD]/SAMPLES/DRUMS/KIT MAKER

If the KIT MAKER folder already exists on your Deluge, copy the contents of KIT MAKER to your existing KIT MAKER folder.

Older Kit Maker Deluge users (2023 and earlier) must update to version 2.3 or above, which fixes a compatibility error that began in a Deluge firmware update. Kits created with the current Kit Maker version will work as expected.
