# Maschine Mode Options

Preferences · https://www.kit-maker.com/docs/km2-maschine-mode-options/

This is the Kit Maker 2 manual. Using Kit Maker 3? Read the Kit Maker 3 manual.

These options affect how kits will be made when processing Maschine Libraries or Komplete Expansions (but will not affect kits made in Sample Pack mode)

**Choke Hi-Hats**

Automatically puts the primary closed Hi hat and Primary open Hi Hat in the same choke group.

This feature is Compatible with:

- Ableton Live
- MPC (and MPC related products such as Force, Desktop software etc)
- NanoStudio 2

### Group Toms

When a kit has 3 or more toms, they will be grouped together on the second row from the top.  Note: Works best with the Classic layout.

### Export Kits to Original Library Locations

Kits are created on the Desktop by default. Enabling this option generates kits in the same directory as libraries you import. Note: If you import libraries from multiple locations, a “Kit Maker Kits” folder will be made for each respective location. This option does not apply to Ableton kits.
